## Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost; nor is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment — just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

### A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

### CLARESHOLM LOCAL NEWS

Born, April 9, to Mr. and Mrs. Leonce D. Clark, a son.

Mrs. Cornelius spent last Friday and Saturday in Calgary.

D. A. Anderson is seriously ill with an attack of inflammatory rheumatism.

Mrs. J. D'Arcy of Calgary was the guest of Mrs. J. F. Hagerman three days last week.

H. C. Sweet, of Lethbridge, was shaking hands with old friends here last Saturday night.

Mr. J. W. Thompson, of Edmonton, Alberta University, was the guest of J. P. Hagerman over the week end.

The Wednesday half holidays this year will commence on May 13th and close on August 12th, both dates inclusive.

Miss Mary McCaig, who has been relief operator at the telephone office for the past three weeks, returned to Stately this week.

Clareholm Chautauque dates have been set for July 22nd to the 28th. These are much more satisfactory dates than we have had some years.

Mr. D. V. Pugh, of the Canadian Bank of Commerce, has been transferred to the Innisfail branch. Mr. Pugh left on Thursday morning.

The Ladies' Aid of the Catholic church are holding their tea and sale of work and cooking in the Lonsheim building on Saturday April 25th, at 3 o'clock.

The regular meeting of L.P.W. A. Local No. 234 will be held on Friday, April 24, at the usual time and place. We hope to have a report of the results concerning the membership drive.—Sec.

The Odd Fellows of Clareholm and district will hold their anniversary service at the Methodist church on Sunday evening, April 26th. They will meet at the lodge room at 6:45 and march to the church.

Rev. W. C. Marsh conducted the three hours service at St. Augustine's church, Lethbridge, on Good Friday. On Monday Mr. Marsh was again in Lethbridge where he gave a lecture on "Symbolism."

All persons having dogs must pay the license fee to Policeman Bissett or the town Secretary and have their dogs licensed before April 30th. After that date all dogs not licensed will be destroyed.

Rev. R. F. Williams, general superintendent of the Church of the Nazarene, an orator of note in the United States, will speak in the Presbyterian church, Clareholm, on Tuesday evening, April 21st, at 8 o'clock.

Miss Daisy Boniface, who has been away on sick leave, returned on Wednesday after spending the past six weeks in Manitoba visiting with relatives. Miss Boniface will resume her duties at the telephone office on Friday the 17th.

The annual Easter tea held under the auspices of St. John's Guild was a great success. The hall was most tastefully decorated in a Japanese tea garden effect and the many touches of art and color combined to make the tea one of the prettiest ever held in the district. The ladies wish to sincerely thank all who in any way contributed to the success of the venture.

The special Easter services in St. John's church will be held on Sunday next, April 19th. There will be a celebration of holy communion at 8 a.m. At the morning service, at 11 o'clock, two memorials will be dedicated by the rector. One, a brass alms basin, has been given by the church in memory of the late Mrs. Hamlyn. The other, an altar book, has been given in memory of the late Mrs. Hamlyn. The annual children's Easter service will be held in the church after the morning service. The evening service will be held at 7:30 o'clock. Appropriate addresses will be given at these services and a very cordial invitation extended to all to attend any or all of these services.

### SPRING SPORTS ON MAY 25 AT CLARESHOLM

The town of Clareholm and district are holding their annual spring sports on May 25th. The program will include horse racing and a baseball tournament. The proceeds of the day will go toward the fund for erecting a new grand stand at the fair grounds.

### Clareholm Tennis Club

At a largely attended and enthusiastic meeting of the Clareholm Tennis Club, held in the Bank of Commerce chambers on Tuesday evening the following officers were elected for the year 1925:

O. L. Reinecke, president; W. G. Moffatt, vice president; J. H. R. Thorne, secretary-treasurer.

The members hope to have the courts in good condition for playing by May 1st and work on these will be started at once. A membership committee consisting of Mrs. Thorne, Mrs. Munro, O. L. Reinecke and Gerhard Chamberlain were appointed and they will call on all prospective members. The Club has always kept the courts in excellent condition and it is to be hoped that sufficient support will be forthcoming to permit this being done this year.

### Clareholm High School—Easter Examinations

Grade XII—Lily Sahlen, 67; Mildred Carey, 62; Clara Simpson, 54; Ellen Hackett, 48; Myrtle Medstad and Warren Jones abse.

Grade XI—Cecil Brandford, 78; Margaret Coutts, 73; Bertie Guy, 73; Amy Mullin, 70; Marion Milnes, 70; Jean Reed, 65; Luella Staal, 63; Mildred Reynolds, 63; Kenneth Smith, 62; Muriel Boniface, 61; Stephen Rasmussen, 54; George Staal, 51; Norma Davies, 48; Arthur Stauck, 47; Douglas Ringrose, 47; John Reynolds, 48; Marina Woback, 44; Marion McManney, 43; Alberta Maxwell, 35.

Grade X—Frieda Staal, 70; Bertha Strangways, 70; Florence Atkinson, 65; Margaret McFay, 65; Duncan MacKenzie, 65; Enid Murray, 65; Islay Weatherhead, 61; Cecile Barre, 59; Glenn Moffatt, 58; Lucille Rice, 51; Dorothea Gledley, 48.

Grade IX—Margaret McMillan, 78; Nellie Wallis, 75; Edmond Edlund, 74; Winnie Hartwell, 72; Grace Amundsen, 71; Res Evans, 71; Jesse Hackett, 69; Ross Moffatt, 68; Leo Nebill, 67; Elmer Smith, 66; Fern Burbank, 63; Olympia Foss, 62; Stella Oviatt, 61; Martha Staal, 58; Kittie Guy, 58; Ruby Sturgeon, 56; Margaret Valette, 50; Jaline Norlin, 48; Everett Arnstad, 41; Ralph Porter, 40; Joseph Bell, 30.

The next two months will be a period strenuous for the school in order that those students who have a chance to pass may be successful at the departmental examinations in June. It is absolutely necessary that they should be present every day, and that the time allotted for home work should not be given to outside diversions and activities which interfere with this. Parents would do well to see that this period for home work is properly used.

F. O. Foster, Principal

### NOTICE TO CREDITORS AND CLAIMANTS

In the Estate of John Stewart Nelson, late of Meadow Creek in the Province of Alberta, Rancher, deceased.

Notice is hereby given that all persons having claims on the estate of the said John Stewart Nelson, who died on the 6th day of January, 1925, are required to file with the undersigned Administrator of his Estate by the 22nd day of April, 1925, a full statement duly verified, of their claims and any securities held by them, and that after that date the Administrator will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or brought to its knowledge.

Dated this 17th day of February, 1925.

The Trusts and Guarantee Company Limited,

to have your harness repaired. Bring them on your next trip to town. Expert harness and shoe repairs. All work guaranteed. Our shoe repair department is up to date. We carry a full line of harness, saddlery, fancy leather goods, trunks and bags, shoe supplies, etc.

J. T. KINGSLEY

## To the Interest of the Public

One great reason why the automobile has become so popular and owned by almost everybody, who almost everywhere has a piano and so many more necessary things, is because a small payment may be paid, and the balance paid in small monthly payments.

What about the farm and home? It wants repairing and painting the worst way, but you say you can't afford to have it done because you have not the ready cash. But a small payment will repair and repaint the home and farm buildings; the cream cheque or egg money each month will pay the balance.

Get your property repaired and repainted and feel prosperous. Save the fuel bill by putting up the windows, making the siding to where it was intended to be, and protected by one or two coats of good paint.

Call and see me or Phone 139 and make arrangements about getting your property painted on the easy payment plan.

I have 150 choice samples of wall paper to select from.

A. H. WALLIS,  
Painter and Decorator

## Paint! Paint! Paint!

The same good tea for 30 years.

### A Winning Fight

In promoting health and combating disease the great majority of people will readily admit the old adage holds true and that an ounce of prevention is worth a pound of cure. The trouble is that when government, municipalities and people in general believe this, they do not always act upon their belief and live up to it. If they did there would be far less sickness and disease, fewer deaths and enormously less physical suffering, all of which would result directly in great financial gain to the State and to the individual citizen, and largely increase the productive power and prosperity of the world.

Again, while people generally agree that prevention is better and cheaper than cure, whether it be in the matter of health, or fire, or war, the majority remain rather lazy on the subject, with the result that they are careless of expenditures necessary to the taking of preventive measures, but at the same time are quite positive in spending money to wage war with evil when one is precipitated but which could have been prevented by foresight and a much smaller expenditure.

Let an alarming epidemic of disease break out and begin sweeping through a community and the people will spend an outlay of money to check it, although they may have year after year refused to vote a comparatively small sum which would have removed the menace which finally caused the epidemic. There was hardly any epidemic of this kind in the city of Montreal in 1918, but there is now no criticism of an annual expenditure of a couple hundred of thousands as Canada's contribution to the cost of the administration of the League of Nations in its endeavor to prevent future wars by removing cause for them.

It is necessary, therefore, to bring to the attention of all people as frequently as possible the decided benefits to themselves resulting from the taking of proper measures of prevention as individuals and as represented by Government, Federal, Provincial and Municipal. It is in the interest of all that attention is drawn in this article to some remarkable advances made in recent years in the scientific prevention of disease.

Take measles as an example. This is a line which the memory of many people when this disease was quite common and the death toll very high. In the city of Montreal in 1885 measles was the cause of 2,164 deaths that year, but the early loss of life of this epidemic was not repeated in the city throughout Quebec with the result that there has been no repetition of the epidemic. On the other hand, vaccination was largely neglected in the Windsor district of Ontario with the result that last year an epidemic in virus form developed, with the result that the disease and death toll was vaccinated 71 per cent died. On the other hand not one single death occurred in the case of a person who had ever been vaccinated. The epidemic was quickly controlled by the vaccination of practically the whole community 50,000 people submitting to vaccination in two weeks. Vaccination is prevention of smallpox, yet in the face of established facts many people neglect to have their children made immune and some even vigorously object to it. Consider diphtheria, once a dread disease, and still all too prevalent because of neglect of proper precautions. Given antitoxin at the first indication of the disease and the chances are all in favor of a mild type of the disease and recovery at the great cost of the disease and the death toll with toxin antitoxin as they will not contract diphtheria, and it has been positively established that through toxin antitoxin children are protected against diphtheria.

Or consider typhoid. Since 1900, typhoid fever, once so prevalent in North America, has been reduced by an average of 78 per cent. This was accomplished almost entirely by human intervention, by stopping the cause of typhoid fever and then destroying it, by what the Minister of Public Health for Saskatchewan has described as, "free-pooling the individual against it." The total abolition of typhoid is quite definitely in sight if individual and communities will only take full advantage of the preventive means now available to all. Already in Saskatchewan typhoid has disappeared from the list of fifteen diseases causing the greatest mortality.

The Great War taught the world one great and invaluable lesson. For the first time in history human beings, whether they were soldiers or civilians, were free from those two old army diseases, typhoid and smallpox, which formerly killed thousands. The compulsory use of methods of inoculation in the army have left objects to vaccination and inoculation without an argument. Typhoid, smallpox, diphtheria, and other diseases, is also being overcome through education and the application of proper methods. The death rate is steadily decreasing. The bottom line is being brought about, not through cures, but by prevention, by vaccination, by free-pooling have the lowest death rate from tuberculosis of all the Frontiers.

In the total banishment of these diseases merely an English dream. No. An eminent public health man draws attention to the fact that hygiene has disappeared from the lives of the people of the world in the last few years. In the population of today, Europe had 19,000,000 of refuge for the homeless lepers of that day. Had leprosy continued, 19,000,000 would have been refuge would be required today, while as a matter of fact there is only one leprosy in Europe an abolished disease. We can likewise abolish smallpox, typhoid, diphtheria and tuberculosis if we go about it the right way and make use of the means which medical science and the tireless research workers of the world have given to us.

### Population of the World

Was 850,000,000 in 1820 and Has

Since 1820 increased to over 2,000,000,000.

In the year 1820 the world had not

\$50,000,000 inhabitants. Since then

the population has doubled. Prof.

Russ estimates that in the year 1920

the world will have three and a half

times as many people as now. "Race

quizzes" is a method of determining

what all, from a broad world view,

the day may come when all

habitable parts of the earth will be as

overcrowded as China. But that the overcrowding problem will be solved some way is a pretty safe bet. As for the present, the farmers will be grateful for more mouths to feed with their surplus produce.

Not Likely Japan and China Have

Designs on Canada

Every now and then some head-banger

states there is his place to tell the

world to beware of the east. But

what real reason is there for believing

that Japan and China have designs

on Canada and the United States?

Both of the latter countries have used

strange tactics in dealing with these

two peoples, but we are still on good

terms with them and will continue to

be as long as cool-headed statesmen

have the last say. We must make it

our business to see that the United

States continue to be in a position to

have the last say—border cities star.

The water has become so acute

in Tokyo that a water famine is feared.

Inhabitants are utilizing ponds

and the sea for the foreign

water is not affected.

### Our Northern Wards

Heavy Cost of Preserving Law and

Order Among the Eskimos

Quite evidently the Eskimo residents

of the northern coastlands of

Canada need a good deal more regula-

tive attention than the mounted police

can give them but in the strength

of that force is very considerably in-

creased. They would get it, too, if

there was a way of making them re-

sponsible for any "accident" talk,

which, she stated, was mostly nega-

tive. She had never met anyone who

would admit to being in favor of the

subject, but many had broached the

subject to her, anxious to convince her

that no such sentiment existed, only

an anger with the government for not

attending more closely to the difficul-

ties of the various sections of the

country.

Speaking of her large audiences in

Canada, Mrs. Snowden said she found

them appreciative and their interest

in the subjects on which she spoke,

delightful. Her strenuous journey

across the continent in less than a

month, she said, had made it im-

possible for her to gather more than

mere impressions of Canadian life

and to make a study of the impression

might later have to be revised.

Canada's Fishing Wealth

Can Be Greatly Increased By Appli-

cation of Scientific Methods

Canada's fishing wealth can be multi-

plied ten times by the application

of scientific methods through the

industry. This is the assurance given

by Dr. G. H. Brown, director of the

Atlantic biological stations.

The great extension of facilities for

scientific investigation projected at

the Atlantic and Pacific coasts, the

inland waters of the Dominion was

outlined by Dr. Huxtable. The new

work will be set up a front line im-

possible to eradicate except through a

series of operations. Theoretically

Brandon. Man

Cor. Third Ave. and Shelver St.

The past week has been favorable for farming operations in this district, though averaging lower temperatures than the previous week. There have been several frosty nights, with snow on Monday which mostly melted as rain and showers early Thursday morning, but neither frost nor moisture sufficient to interfere much with farming operations. Considerable seeding has been done this week, with the soil in the best possible condition. Everything at the present time points to a favorable season.
